Geosciences & Data Acquisition Company

[www.petroseismicsservices.com](http://www.petroseismicsservices.com)

Petroseismic Services comes up from the extensive experience of its directives, with the aim of rising the standards of technical and human quality of seismic acquisition in Colombia, understanding the social and environmental problems of each area to be explored, while implementing state of the art technology in seismic acquisition.

With this aim, the first projects were executed in jungle areas of southern Colombia, then taking our efforts to swampy areas (Middle and Lower Magdalena Valley), desert (Guajira) and the mountains and plains of eastern Colombia.

In 2017, Petroseismic started operations in Bolivia (Subandino basin), with the goal of expand our experience while we carry our good practices and technical and operational learning curves.
